- Customer and Supplier records
- Reporting on Job Profitability

Optionally:-
- Sage 50 Link (optional)
- Works Order Timesheet

A fast and simple desktop database solution on a Microsoft Access platform, with links to Outlook email and Sage 50 if required

Job Profitability

Do you need to really understand the financial performance of your jobs? A database such as Amber-JMS joins up invoicing and job costs, so that you can see actual job profit – quickly and easily. Corrective action can be taken, and lessons learnt on costing and pricing.

Simpler creation of Despatch Notes and Invoices

Are despatch notes and invoices being created manually from completed job cards? Amber-JMS saves time by automatically generating despatch notes and sales invoices from completed jobs

Tracking

Are you finding it difficult or time-intensive to track jobs, from quote, to sales order, to work order(s), and to delivery and part-delivery, and to invoicing and part-invoicing? Amber-JMS simplifies much of this tracking, and greatly speeds up any cross-referencing required.

Customer Delivery Dates

Are these being met? If not, would more advanced warning help to prevent problems? Amber-JMS makes it easy to identify which jobs need urgent attention.

Sage 50 Link

Optionally, if you have Sage 50, as Registered Sage Developers we are able to post invoices straight into Sage Accounts, at the click of a button. This again avoids repeat typing, saves time and helps to avoid errors.

Designed for small engineering firms

Amber-JMS has been designed for small engineering firms from the bottom up - largely from the experience and demands of bespoke database software written for many such firms over many years.

Simple to Use

No need to spend large amounts of time training staff not to use certain fields, screens or reports. Little if any training is required and heavy user guides are simply not necessary.

Easy configuration

No complicated configuration is required when you install Amber-JMS. Everything you see on the screen has been carefully considered and based on our extensive experience of developing projects for people like you.
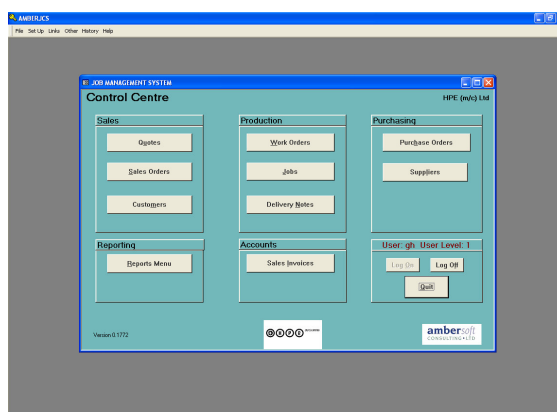

Simple Set-Up

Let us import your existing data into your new system for you.

Affordable

There is no need to make a large investment or long-term commitment – try our low-cost low-risk monthly rental option

Bespoke options

Take a look at Amber-JMS. You should be impressed. But if you want more then we certainly have the resources, experience, talent and energy to deliver bespoke solutions to meet your particular needs.
